

**IN THE CLAIMS:**

Please delete the text of Claims 1, 13 and 15 and insert therefore the following:

1. (Four-times Amended) A device for assisting a person in achieving proper alignment of the person's eyes when the person is in position to perform a task, comprising:

a support member upon the person's head;

a light source attached to the support member, the light source being attached to the support member to generate a generally linear, alignment beam of light on a surface visible to the person, the support member maintaining the light source in a position on the user's head such that the alignment beam of light is generally parallel to an alignment of a plane transversing the person's eyes when the person is in position to perform the task.

13. (Thrice Amended) The device of Claim 1 wherein the support member comprises a band adapted to be worn on the head of the person, the light source being attached to the band to be positioned to the side of one of the eyes of the user.

15. (Twice Amended) A device for assisting a person in achieving proper alignment of a portion of the person's body in a desired direction when the person is in position to execute a golf stroke, the device comprising:

a support member to be worn by the person upon the person's body;

a light source attached to the support member, the light source being attached to the support member to generate a generally linear, alignment beam of light on a surface visible to the person that is generally parallel to a line passing transversely through the portion of the person's body to provide to the person an indication of the alignment of the portion of the person's body.
